

Fytera® Perform

Harnessing the power of plants for optimal feed conversion

Why Fytera Perform?

Feed conversion ratio has a major **impact on profitability** of poultry production

Fytera Perform contains the **target phyto-actives** from three plants with more than 15 individual compounds

Independent research shows a **consistently improved feed conversion ratio** in broilers

The business challenge: Do not let your profitability be harmed

Most livestock perform at about 40% below their genetic potential due to suboptimal environmental conditions, including housing, stocking density, nutrition programme, climate, and disease pressure. Those conditions are often associated with inflammatory processes, reduced nutrient absorption, and impaired gut barrier function that all divert nutrients away from growth. There is a need for natural ways to help the animal reach its genetic potential.

PhytoComplex solutions: An integrated strategy

PhytoComplex solutions consist of novel plant-based functional ingredients that support specific physiological and metabolic processes in production animals. High quality ingredients form the basis of highly targeted solutions to challenges in livestock production.

Recommended use

To ensure homogenous dispersion, Fytera Perform should be added to a premix.

Inclusion rate for poultry:

- Fytera Perform: 25 g/t of complete feed

Proven results

Studies conducted around the world at independent research institutes have shown Fytera Perform to consistently improve feed conversion ratio (figure 1).

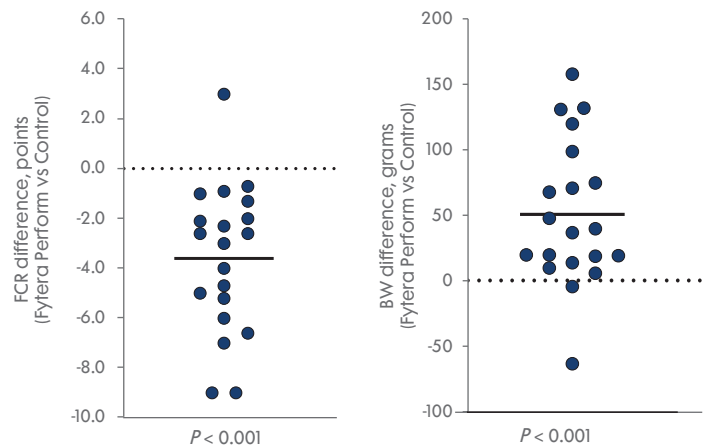

Figure 1. Effect of Fytera Perform on feed conversion ratio (FCR) and body weight (BW) in broilers compared to a negative control (dotted zero line).

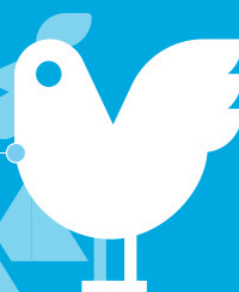

Fytera® Perform

PROVEN EFFICACY

- FCR - 3.6 points
- BW +51g

>15 STUDIES ON 4 CONTINENTS

BROILER GENETICS

>  > Ross and Cobb

BEST OF 3 PLANTS

Standardised, quality-controlled, with more than 15 phyto actives.

FCR: Feed conversion ratio BW: Body weight

2025

Summary

Product: Fytera Perform

Use for: Poultry

Benefit: Supports optimal performance and feed conversion

Programme: PhytoComplex solutions; Production efficiency
